## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, see pages 1-3, filed 5 January 2006, with respect to all claims have been fully considered and are persuasive. The previous rejection of all claims has been withdrawn.

### *Allowable Subject Matter*

2. Claims 1-8 are allowed over the Prior Art of record.

3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the independent claims 1 and 6 is the inclusion of the specific limitations and/or method steps, wherein an apparatus and/or method for producing a sample of mainly grained and dry material for ***determining the residual carbon content*** (emphasis added) of the material; wherein the torque or driving force of feeding the material is monitored and subsequently interrupted when an ***abrupt increase in the torque/force*** (emphasis added) is detected/measured. None of the Prior Art disclose these particular limitations emphasized above. The closest Prior Art reference is US 4,498,338 to Peltonen et al. (see Figs. below) which discloses a device which feeds material similar to that of the instant invention, however, there is no monitoring of the torque/force of the driving element.
